## SUMMARY

I am a frontend web developer and web designer with strong communication skills, currently pursuing a degree in Engineering with a specialization in AI and ML. I am seeking real industry work experience to apply my technical skills, creativity, and problem-solving abilities in a professional setting. Eager to contribute to dynamic projects while continuing to grow and learn in the tech industry.

---

## WORK EXPERIENCE

### Created a interactive website

Present

- Developing a website aimed at solving the problem of gathering study notes for students. The platform allows students to access a comprehensive collection of notes and facilitates interaction with their seniors for guidance and additional resources.

March 2023

### Did research on impurities of Milk using ML

- Collected and analyzed data from various sources including sensor readings and lab tests to detect impurities in milk.
- 

## EDUCATION

### Bachelor of Science in Artificial Intelligence and Machine Learning

Sep 2023-Current time

Muffakham Jah College of Engineering and Technology

### Certification in Basics of Machine Learning

Sep 2024

Completed high school at Little Scholar School, Mahabub Nagar, and pursued intermediate studies at Rishi Junior College.
